DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, and 94-96 and 108-114, drawn to method for producing a methylotroph yeast that is capable of producing a mammalian-type sugar chain.

Group II, claim(s) 26-30, drawn to inventions pertaining to an orotidine 5' phosphate decarboxylase (URA3) gene.

Group III, claim(s) 31-35, drawn to inventions pertaining to a phosphoribosyl-aminoimidazole synthase (ADE1) gene.

Group IV, claim(s) 36-40, drawn to inventions pertaining to an imidazole-glycerol-phosphate dehydratase (HIS3) gene.

Group V, claim(s) 41-45, drawn to inventions pertaining to a 3-isopropylmalate dehydrogenase (LEU2) gene .

Group VI, claim(s) 46-49, drawn to inventions pertaining to an alpha-1,6-mannosyltransferase (OCH1) gene.

Group VII, claim(s) s 50-53, drawn to inventions pertaining to a PEP4 gene.

Group VIII, claim(s) 54-57, drawn to inventions pertaining to a proteinase B (PRB1) gene.

Group IX, claim(s) 58-69, drawn to inventions pertaining to a YPS1 gene.

Group X, claim(s) 70-73, drawn to inventions pertaining to a KTR1 gene.

Group XI, claim(s) 74-77, drawn to inventions pertaining to an MNN9 gene.

Group XII, claim(s) 78-85, drawn to inventions pertaining to an alcohol oxidase (AOX) gene.

Group XIII, claim(s) 86-93, drawn to inventions pertaining to a glyceraldehyde-3-phosphate dehydrogenase (GAPDH) gene.

The inventions listed as Groups I-XIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of each group is different, since it is in each group, the structure of the recited gene or protein encoding sequence, and/or the microorganism comprising said gene, and/or the microorganism lacking said gene, and/or the method of using or making said microorganism, said genes having different structures and functions.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 1636

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Claims 5-25, 69, 97-107 and 115-122 are in improper form because a multiple dependent claim may not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been assigned to restriction groups.

The Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nancy T. Vogel whose telephone number is (571) 272-0780. The examiner can normally be reached on 7:00 - 3:30, Monday - Friday.
